A WORD FROM US

Positive Life & Learning Solutions provides center-based Applied Behavior Analysis (ABA) services for children with autism and related developmental needs. Our team delivers individualized, evidence-based therapy focused on communication, social skills, independence, and positive behavior change. We use data-driven practices to track progress and adjust treatment to meet each child's unique needs. We also work closely with families to support skill growth across home, school, and community settings.

ABA FUN FACTS

Did you know kids learn best when learning feels like play? In ABA, therapists use games, toys, and fun activities to help children learn new skills!

BLACK HISTORY

FEBRUARY EVENTS

PAJAMA DAY - FEB 11
