A WORD FROM US

Positive Life & Learning Solutions provides center-based Applied Behavior Analysis (ABA) services for children with autism and related developmental needs. Our team delivers individualized, evidence-based therapy focused on communication, social skills, independence, and positive behavior change. We use data-driven practices to monitor progress and adjust treatment to meet each child's unique needs. Throughout the month of June, we continue to work closely with families to support skill development across home, school, and community settings.

hello
SUMMER

SUMMER IS HERE

Update your kiddos' summer availability ASAP. This is the time to inform us of upcoming trips and to maximize missed therapy hours!

WHY WE CELEBRATE JUNETEENTH

Juneteenth is a time to honor freedom, resilience, and the ongoing pursuit of equality. This holiday commemorates June 19, 1865, when enslaved African Americans in Texas were finally informed of their freedom. At our ABA clinic, we celebrate Juneteenth by recognizing the importance of diversity, inclusion, and respect for all individuals and families we serve. We believe that understanding and appreciating different cultures helps create a supportive and welcoming environment for everyone. Through education and reflection, we honor the past while continuing to promote acceptance, equity, and opportunity within our community.
